Announcing PowerTracks Pro Audio 2014 for Windows®!

PowerTracks Pro Audio is a fully-featured, powerful music sequencing and digital recording program. With version 2014, we've added lots of great new features and a **great new look!**

The new PowerTracks Pro Audio 2014 incorporates many new features and enhancements, including suggestions from users of the program as well as our own "wish list."

New Features Include:

- The **user interface has been reorganized for easier and more intuitive use. The toolbar buttons are arranged in groups according to function.**

- **New Node-based automation is now available** to automate your mixes with precise volume cuts, boosts, and fades on any track.

- The Tracks Window now lets you **resize track heights individually** by dragging the border with the mouse.

- **Vocal Synth support automatically generates synthetic vocal tracks** from a MIDI track that contains lyrics.

- **Drag-and-Drop** from the Tracks Window to another program **now supports 3 more file formats: MP4, M4A, and MP3** (in addition to WAV and WMA).

- MP4 and M4A files can now be **dragged and dropped into the Tracks window**.

- **Import Wave dialog now supports MP4 and M4A.**

- If, during editing, there is **currently a sustained note** in the notation window, on a guitar track, in editable mode, and you click on a guitar string, the note will be **assigned to that string**.

- Chords window font, and Notation window fonts, will likely **look smoother** on many systems.

- **Options to display full measure rests as slashes** on each beat of the measure.

- Current Note indicator on the Notation Window now **shows transposed value** if notation is transposed.

- Nice **handwritten "Real" looking Chords Font** added.

- **Improvements made in entering and viewing guitar notation.**.

- Easier method of guitar tab entry.

- **Improved Drop Station** in the Tracks Window with quadrants for different target file types.

   …and many more!
